## PROFESSIONAL SUMMARY

Data Analyst / Business Analyst with hands-on experience building KPI-driven Power BI dashboards, performing SQL-based data analysis, and automating reporting workflows across Snowflake, Excel, and SharePoint data sources. Skilled in data cleaning, ETL, data validation, data modeling, DAX optimization, and business intelligence reporting. Experienced in translating business requirements into scalable dashboards, collaborating with stakeholders, and delivering actionable insights that support strategic decision-making and operational efficiency.

## EXPERIENCE

### Business Analyst — Knack RCM

Nov 2024 – Present

- Designed Power Apps solutions integrated with SharePoint to streamline operational processes and improve team productivity.
- Built interactive Power BI reports by combining information from Snowflake, SharePoint, and Excel, enabling KPI monitoring and executive decision-making.
- Extracted, transformed, validated, and consolidated datasets from multiple sources to maintain accurate and consistent analytics.
- Streamlined recurring analytical processes using Power BI, Excel, and Power Automate, significantly reducing manual effort.
- Configured Power Automate workflows to schedule dataset refreshes and automate routine operational tasks.
- Partnered with cross-functional teams to gather requirements and translate them into scalable BI solutions.
- Evaluated operational trends using SQL, Excel, and Power BI, providing actionable recommendations to improve performance.
- Created KPI scorecards and analytical reports for tracking operational metrics and organizational goals.
- Conducted ad-hoc analysis to answer leadership queries and identify improvement opportunities.
- Enhanced ETL workflows by optimizing Power Query transformations, improving dataset quality and refresh efficiency.
- Collaborated with end users to identify reporting gaps and implemented feature enhancements based on feedback.
- Performed reconciliation and quality assurance checks to ensure reporting accuracy before deployment.
- Consolidated more than 100 Power BI reports into a centralized workspace while maintaining permissions, scheduled refreshes, and report functionality.
- Standardized report layouts, themes, and visualization practices to ensure consistency across the analytics portfolio.
- Optimized DAX calculations to improve report accuracy, responsiveness, and overall performance.
- Migrated report connections to SharePoint folders, updated Power Query logic, and validated refresh pipelines for improved scalability.

## TECHNICAL SKILLS

**BI & Reporting:** Power BI, Excel, Google Sheets, Dashboard Development, KPI Reporting, Data Visualization

**Database & Analysis:** SQL, MySQL, Snowflake, Data Cleaning, Data Validation, Reporting Automation

**Automation Tools:** SharePoint, Power Apps, Power Automate, Workflow Automation

**Programming:** Python (Pandas, NumPy, Matplotlib)

**Business Analysis:** Requirement Gathering, Stakeholder Management, Business Process Improvement

**Additional Knowledge:** AI Prompting, APIs, Gemini

## KEY PROJECTS

**Sales Performance Analytics Dashboard— Excel, SQL, Power BI**

**Objective:** Developed an interactive sales analytics dashboard to monitor business performance and identify sales trends across regions, products, and customers.

- Built interactive dashboards using **Power BI** and **Excel** to analyze sales performance, profitability, customer behavior, and regional trends.
- Used **SQL** to extract, clean, and transform sales data, ensuring accurate and reliable reporting.
- Developed KPIs and DAX measures to track revenue, profit margin, sales growth, and product performance with interactive filters and drill-through functionality.
- Identified underperforming regions and product categories through trend analysis, enabling data-driven sales strategy recommendations.

### **Retail Business Intelligence Dashboard— SQL, Power BI**

**Objective:** Analyzed revenue and profitability to evaluate customer, store, and product performance for business decision-making.

- Performed revenue and profitability analysis using SQL by evaluating high-value customers, store performance, product categories, and return rates.
- Wrote complex SQL queries using joins, CTEs, aggregate functions, and window functions to extract and analyze business data.
- Designed interactive Power BI dashboards with DAX measures and KPIs to visualize revenue trends, customer segmentation, and profitability.
- Delivered actionable insights that highlighted key revenue drivers, profitability trends, and business improvement opportunities.
- Built an optimized data model and applied advanced DAX calculations to analyze profitability trends and support data-driven business decisions.

## **CERTIFICATIONS**

---

- Google Data Analytics Professional Certificate — Google
- Data Analysis with Python — IBM
- Python for Data Science, AI & Development — IBM
- Introduction to Statistics — Stanford University
- Automation and Scripting with Python — Coursera
- Introduction to Artificial Intelligence (AI) — IBM
- Generative AI: Introduction and Applications — IBM
- Generative AI: Prompt Engineering Basics — IBM

## **EDUCATION**

---

**B.Com (Accounting & Finance)**

Punjabi University, Patiala, Punjab

*July 2019 – July 2022*
